

## **Warranty**

The following warranty protection applies to system components:

**Mask Assembly** (Excludes inlet and exit valve): 12 months

The valves are wearing parts and are not covered by warranty protection.

**Medicated Cup:**

The medicated cup is a wearing part and its life is very dependent on the drug used and how well it is maintained between uses. Therefore the nebulise component is not covered by warranty protection.

**Controller and Cable:** 12 months

**Battery:** 6 months

**Power Supply:** 12 months

Any damage caused by the omproper handling is not subject to warranty protection. The warranty expires when the device has been interfered with by a third party.
